SCIENTIFIC

Dependable Performance. Unmatched Safety. Exceptional Value.

The success of your work demands precision and control.

Thermo Scientific Cimarec® , Super-Nuova™ and RT™ Series deliver results with an extensive selection of hot plates, stirrers and stirring hot plates. An impressive combination of superior performance, advanced safety and operational simplicity makes it easy to find the perfect instrument for your laboratory requirements.

- ▶ **Exceptional performance**
Easy-to-read digital controls set the industry standards for accuracy and repeatability
- ▶ **Intelligent technology**
Patented Thermo Scientific StirTrac™ technology delivers outstanding precision and consistency
- ▶ **Uncompromising safety**
Exclusive HOT TOP Warning System ensures ultimate workplace safety

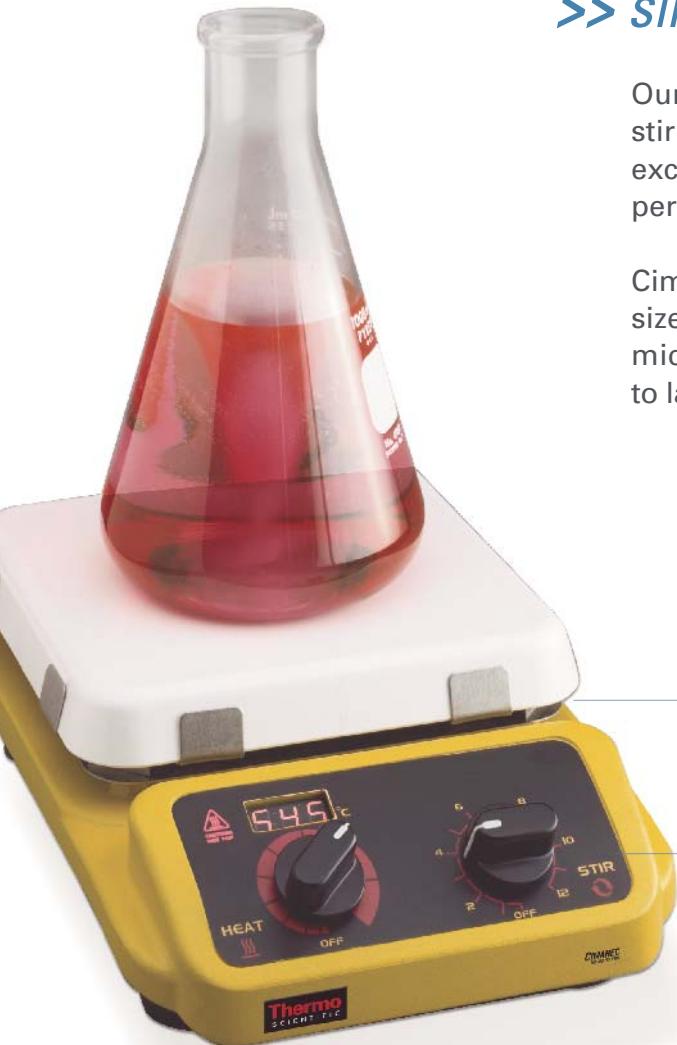

Thermo S

THERMO SCIENTIFIC CIMAREC

>> simplicity, safety and value

Our Cimarec Series digital stirrers, hot plates and stirring hot plates offer precise stirring control, exceptional safety and superior temperature performance for your routine protocols.

Cimarec is available in three sizes offering flexibility from microscale chemistries to larger vessels.

Ultra-flat top and high wattage heating deliver superior heat transfer and a fast time-to-boil.

Intuitive digital display indicates temperature settings which are adjustable in 5°C increments from 5°C up to 540°C (41°F to 1,004°F).

Advanced technology

- StirTrac features innovative Thermo Scientific engineering for excellent slow-speed stirring, consistent speed control and stronger magnetic coupling
- Instant braking quickly stops the stir bar for immediate flask removal
- Unique HOT TOP Warning System protects from accidental burns with prominent display when heating surface is above 50°C (122°F)

Flexible and robust design

- Sturdy low-profile cast aluminum provides stability and durability
- Variable sizes for different sample weights

Flashing HOT TOP Warning System alerts users and passers-by when surface is above 50°C (122°F) while unit is off for exceptional workplace safety.

Microprocessor-controlled feedback sensor technology maintains consistent temperature.

Flexible features and maximum benefits

With the industry's largest breadth of features and options, our Cimarec, Super-Nuova and RT Series support all your applications – from basic stirring needs to the most precise high-temperature heating and control. Optimize your process and customize your workflow.

	Cimarec	Super-Nuova	RT	RT-Elite	Benefit
Safety Features					
Unique Cast Aluminum Body Design	•	•	•	•	Guides any spilled liquids away from electronics, protecting the circuitry
Patented HOT TOP Warning System	•	•	•	•	Visual warning system eliminates burns
Low Profile Design	•	•	•	•	Stable and rugged base prevents tipping and spillage
Walk-Away Timer		•		•	Automatic, unattended operation
User-Adjustable Over-Temperature Protection		•	•	•	Prevents overheating, short circuiting and internal damage in case of overflow protecting samples
Control Features					
Digital Stir Display		•		•	Precise repeatable stirring control
Digital Temperature Display	•	•	•	•	Precise and easy-to-read
Microprocessor-Controls	•	•	•	•	Improved heating efficiency
Pre-Set Controls		•		•	Convenience and time savings for repeated experiments
Performance Features					
Patented Stir-Trac Technology	•	•	•	•	Exceptional slow-speed stirring, strong magnetic coupling and immediate stir bar breaking for quick flask removal
High-Wattage Heating	•	•	•	•	Fast time-to-boil
Seamless Reflective Ceramic Top	•	•			Improved sample visibility
External Temperature Probe		•	•	•	Improved accuracy and repeatability
Flexibility Features					
Top Configuration	Ceramic or Aluminum	Ceramic or Aluminum	Stainless or Aluminum	Stainless or Aluminum	Variety of top plate material for any application
Range of Sizes	3	1 and 4 - position units available	1	1	Ideal for any application
RS-232		•		•	Outputs to PC, gathers data automatically

Thermo Scientific THERMO SCIENTIFIC SUPER-NUOVA

>> unparalleled performance

Our Super-Nova Series stirrers, hot plates and stirring hot plates provides top-of-the-line performance, superior safety and simple operation.

Super-Nova is available in two sizes, including a multi-position model with four individually controlled stirring positions. Sophisticated controls and settings are standard for applications that demand advanced precision.

Our stirring hot plate models feature separate easy-to-read digital displays which indicate temperature settings for heating and stirring, adjustable in 1°C and 1 rpm increments.

Sophisticated controls

- Microprocessor display maintains consistent, temperature and stirring speeds
- User-controlled calibration sets remote probe to external standards and temperature
- User-programmable preset buttons quickly recall up to four frequently used temperatures and/or stirring speeds
- RS232 port outputs time count, temperature and set point directly to your PC

Advanced technology

- StirTrac features innovative Thermo Scientific engineering for excellent slow-speed stirring, consistent speed control, and stronger magnetic coupling. Instant braking quickly stops the stir bar for immediate flask removal
- Unique HOT TOP Warning System protects from accidental burns with prominent display when heating surface is above 50°C (122°F)

Exceptional safety and protection

- Single knob design controls both heating and stirring. Lock-out feature avoids accidental control adjustments
- Walk-away timer shuts off heating, stirring or both after a preset user-defined interval
- Independently adjustable over-temperature protection prevents runaway conditions

Thermo Scienti

THERMO SCIENTIFIC RT AND RT ELITE

>> smart design and control

Our RT and RT-Elite Series digital plates are designed with a sleek round top for exceptional temperature control and uniformity, along with, the advanced safety and stirring technologies that are the hallmark of the Thermo Scientific brand.

Choose RT Series for standard applications that require digital stirring and remote probe capabilities. Upgrade to RT-Elite Series for high-performance applications that require precise controls.

User-friendly controls with triple LCD's that display temperature, stir speed and time simultaneously for optimum performance.

Solid base for increased stability on lab jacks and benchtops.

Advanced technology

- StirTrac features innovative Thermo Scientific engineering for excellent slow-speed stirring, consistent speed control and stronger magnetic coupling
- Instant braking quickly stops the stir bar for immediate flask removal
- Unique HOT TOP Warning System eliminates accidental burns with prominent display when heating surface exceeds 50°C (122°F)

Intelligent simplicity

- Ultra-precise temperature and stirring control for exceptional reliability: set temperature within 1.0°C and display of actual temperature within 0.1°C
- Intuitive user interface, featuring single knob design with individual displays controls heating, stirring and timing (RT-Elite Series only)
- User-programmable preset buttons quickly recall up to three temperatures and/or stirring speeds within 1 rpm
- RT-Elite Series adjust temperature in increments of 1°C up to 350°C (662°F); RT Series in increments of 2°C up to 100°C (212°F) and 5°C over 100°C (212°F)
- RS232 port outputs time count, temperature and set point directly to your PC

Built-in safety and protection

- Walk-away timer shuts off heating, stirring, or both after 1-999 minutes (RT-Elite Series only)
- Innovative temperature control design prevents run-away temperature conditions
- Cord retention bracket prevents loose power cord connections that can cause electrical arcing

>> uniquely powerful Komet magnetic stirring bars

ACCESSORIES

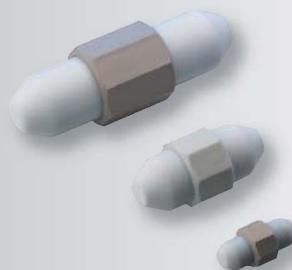

Up to three times the torque of conventional bars

Thermo Scientific Super-Strong Komet Magnetic Stirring Bars

- High energy Samarium-Cobalt (SmCo) magnetic core
- Superior mixing action at high speeds, and with viscous media
- Evenly coated PTFE surface prevents residue deposits
- Steam sterilizable to 121°C (249.8°F)
- Long-life stirring bars with wear-resistant glide ring
- Significantly enhanced stirrer performance and applications versatility

Standard Komet stirring bars are available in four different sizes.

Our Komet glide-ring stirring bars offer highest wear resistance.

Cat. No.	Model	Shape	Diameter (mm)	Length (mm)
50087902	Komet 90, 1 pack	Round	25	90
50087909	Komet 50, 1 pack	Round	21	50
